MTR Recommendations and Management Responses on the GEF Pacific R2R Project - Updates

Mr Antonio will present to the Committee, for its information and consideration, a short update of progress implementing the RSC approved MTR recommendations and management responses.

Participants will be given the opportunity to clarify matters critically impacting implementation of their respective projects (especially for the STAR projects). For instance, joint steering and programmatic implementation (advocacy towards changes in planning process and/or policy), data and information sharing, and results reporting.

The detailed updates are provided in the meeting paper *GEF IW R2R/RSC.6/WP. 04* and power-point presentation. The paper specifically invites discussion and decision on progress of implementation.

Status of the regional IW R2R project

Mr Sauni will introduce the discussion paper *GEF IW R2R/RSC.5/WP. 05* on the status of the GEF Pacific International Waters R2R Project. Based on their status report in the working paper and power-point presentation, the participants will be given ample time and opportunity to reflect, discuss and clarify management and implementation concerns.

Participants will be able to use this information and opportunity to recommend appropriate management measures that will enhance and facilitate achievement of the project outcomes.

Discussion

Dr Mafieo will open for discussion focusing on guiding questions presented for each paper. A quick summary of recommendations will be presented in closing the session. The panellists Mr Antonio and Mr Sauni will respond to specific questions or issues of clarifications from the papers.

With focus on the session them of stocktake, it would be good to spend time looking at the challenges face progressing implementation of the MTR recommendations and regional IW R2R project. As well identify areas need strengthening and other appropriate measure needed to enhance achievements – e.g. given the COVID-19 pandemic impacting on projects and thus delays, do we need more time to deliver? Note the discussion may also link and therefore revisit when we get to other sessions.

Guiding questions: -

- (i) Clarify matters that critically impact implementation projects and delivering on joint steering and programmatic implementation, data and information sharing and results reporting?*
- (ii) Reflect on implementation and challenges for the Regional IW R2R project and recommend appropriate measures to enhance achievement of project outcomes?*
