

## Fiji R2R IW RESULTS FRAMEWORK

Components	Outcomes	Indicator	Baseline	Targets End of Project	Source of Verification	Risks and Assumptions
<b>1. Strengthening capacity for watershed assessment, mapping and planning</b>	1.1 Improved capacity in participatory watershed assessment and planning in Waimanu catchment	1.1.1 Baseline data and information collected, analyzed and assessed.	Governance, socioeconomic and bio-physical attributes of watersheds needs to be documented	Data collated on the project site upon research meetings, mapping and semi-structured interview	<ul style="list-style-type: none"> <li>- Baseline assessment report published and accessible on line</li> <li>- Activity report indicating participation of stakeholders in baseline assessment</li> </ul>	Availability and accessibility of socio-political-economic, and geophysical data and information for assessment including recent surveys and resource assessments conducted by the various stakeholders (such as Fiji STAR project, USP-IAS, etc.)
		1.1.2 Diagnostic analysis (DA), Participatory Rapid Resources Assessment (i.e. RaPCA), Ecosystem Goods and Services (EGS) conducted	Threats are not established along the Waimanu catchment	Diagnostic analysis, DA, RaPCA and EGS conducted for Waimanu Catchment as input in the preparation of Waimanu Catchment management plan.	<ul style="list-style-type: none"> <li>- DA, RaPCA and EGS reports for watersheds, published and accessible online.</li> <li>- Activity report indicating participation of stakeholders in the DA, RaPCA and EGS.</li> </ul>	<p>That landowners will provide access to watershed areas for assessments.</p> <p>Availability of consultant/s who shall carry out the tasks at short notice.</p>

1.1.3 Participatory catchment management planning conducted for Waimanu catchment	There is no baseline participatory catchment management planning for Waimanu catchment	Wide participation and involvement of stakeholders and communities in the formulation of Waimanu Catchment Management Plan	<ul style="list-style-type: none"> <li>- Activity report indicating participation of stakeholders in the formulation of the Waimanu catchment management plan</li> <li>- A copy of draft Waimanu catchment management plan</li> </ul>	<p>Limited capacity within responsible agencies for participatory catchment management planning</p> <p>Availability of consultant/s who shall carry out the tasks at short notice.</p> <p>Note: This is linked to outputs 1.1.1 and 1.1.2.</p>
1.1.4 Waimanu catchment Management plan adopted at the province level.	There is no baseline adoption of Waimanu catchment management plan	Draft Waimanu Catchment management plan legitimized/ adopted at division level.	<ul style="list-style-type: none"> <li>-Records on the management plan deliberations or proceedings of the stakeholder meetings.</li> <li>-Published approved Waimanu catchment management plan and corresponding implementation/ work plans.</li> </ul>	Effective management of the Waimanu catchment remains a priority of the stakeholders

<p><b>2. Reducing stress on vulnerable freshwater resources by implementation of the management plan.</b></p>	<p>2.1 At least 500 hectares of unprotected watershed under the management plan.</p>	<p>2.1.1 By the end of the project, commitment of Waimanu stakeholders for the implementation of the stress reduction measures secured</p> <p>2.1.2 By 2021 at least 500ha are protected.</p>	<p>There is no Waimanu Catchment Management Plan</p>	<p>At the end of the project, commitment of Waimanu stakeholders for the implementation of at least 50% of the stress reduction measures secured.</p>	<p>Reports, minutes of the meetings on implementation of the stress reduction activities/ priority activities</p>	<p>Landowners, Government and Stakeholders commitment to work together on joint planning and management</p>
<p><b>3. Developing the enabling environment for the replication and scaling-up of best practices in watershed management</b></p>	<p>3.1 Functional guidance or guidelines in catchment management planning</p>	<p>3.1.1 Participatory catchment management planning guide available and endorsed to appropriate Fiji authorities and partners review.</p> <p>3.1.2 Participatory catchment management planning guide advocated for national scaling</p>	<p>Wildlife Conservation Society (WCS) Facilitator's Guide for Ecosystem-Based Management Planning in Fiji</p>	<p>Draft technical bulletin or memorandum circular for catchment management planning is established.</p> <p>Workshop, meeting with stakeholders to present the draft participatory catchment management planning guide</p>	<p>Guidance document for national mainstreaming.</p> <p>Published Watershed Management Plan Guideline for Fiji</p>	<p>Securing expertise to ensure the social, legal, hydrological and ecological aspects of watershed planning are adequately reflected in the review report.</p> <p>Adequate expertise can be commissioned to lead the preparation of the catchment management planning guide.</p> <p>Note: This is linked to output 1.1.3</p>
